FARMERS INTERESTED IN CORN CONTEST

Answering your inquiry asking how many joints of 2-inch pipe can be made from a sack of cement, three-inch cement pipe is hardly to be recommended, and 4-inch is the smallest practicable size. The cost of the 4-inch pipe is so low that no one thinks of using a smaller pipe. The 8-inch pipe, which is used on the university campus, a great deal, costs 14 cents per foot for the pipe and probably 2 cents a foot additional for laying. The 4-inch pipe would cost you about 7 cents a foot and another 1 cent for laying. The number of feet of 4-inch pipe which you can make per sack of cement is about 70 or 75—Prof. G. E. P. Smith, Irrigation Engineer, U. of A. Agricultural Experiment Station.

SAGE AND SULPHUR DARKENS GRAY HAIR

Brush this through faded, lifeless locks and they become dark, glossy, youthful.

Hair that loses its color and luster, or when it fades, turns gray, dull and lifeless, is caused by a lack of sulphur in the hair. Our grandmother made up a mixture of Sage Tea and Sulphur to keep her locks dark and beautiful, and thousands of women and men who value that even color, that beautiful dark shade of hair which is so attractive, use only this old-time recipe.

Nowadays we get this famous mixture by asking at any drug store for a 50 cent bottle of "Wyeth's Sage and Sulphur Compound," which darkens the hair so naturally, so evenly, that nobody can possibly tell it has been applied. Besides, it takes off dandruff, stops scalp itching and falling hair. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time. By morning the gray hair disappears, but what delights the ladies with Wyeth's Sage and Sulphur is that, besides beautifully darkening the hair after a few applications, it also brings back the gloss and luster and gives it an appearance of abundance.—Advertisement.
